

QUALITY POLICY

The Management of A.S.A (a company dedicated to application and treatment of surfaces in the industrial and naval sectors) aware of the importance of continuous improvement and the satisfaction of our customers, has decided to implement a quality management system based on the ISO standard 9001 (u.v.v) that allows us to achieve three basic objectives:

1. The complete satisfaction of our customers with the products and/or services provided.
2. The permanent improvement of the management of our company, establishing a business strategy that is reviewed periodically.
3. Compliance with the requirements established by technical regulations and applicable standards by all personnel and interested parties involved in the provision of the service.

To achieve these objectives, I assume the commitment to provide the company with the appropriate structure, as well as the necessary human and material resources that favor the continuous improvement of our Management System.

This policy will be disseminated to all staff and interested parties, as well as periodically reviewed by the Management.
